## COMMENTARY

## Overview and trading environment

Consumer spending in the country has remained constrained over the past six months, impacting particularly on the middle income segment which is the core target market of the Clicks chain.

In these demanding trading conditions Clicks is maintaining its competitive position and continues to show real growth in comparable stores. The brand's strong value offer is driving sales growth as the health and beauty markets remain resilient.

UPD's integrated wholesale and distribution strategy is working well, reflected in solid growth in turnover and share gains in both the wholesale and distribution markets.
The group continues to invest for longer-term growth in both its retail and distribution businesses. In addition the group has signed an exclusive agreement to launch GNC, a global leader in health and wellness products.

## Financial performance

Group turnover increased by $9.6 \%$ to R9.3 billion, with retail sales growing by $7.4 \%$ and UPD by $14.7 \%$. Selling price inflation averaged $3.5 \%$ for the period.
Total income increased by $9.1 \%$ and the total income margin was 10 basis points lower at $27.0 \%$ as a result of UPD growing at a faster rate than the retail business. The retail total income margin improved by 40 basis points to $33.4 \%$ through private label margin growth and well managed promotional campaigns in Clicks.
Operating expenses grew by 9.7\%. Retail costs were 9.8\% higher owing to the increased investment in new stores, pharmacies and staff. Comparable retail cost growth was contained below sales growth at $6.6 \%$. The $12.6 \%$ cost growth in UPD reflects the investments in wholesale automation and distribution warehouse capacity, as well as additional variable costs relating to distribution contracts secured in the past year. UPD's cost growth is expected to moderate in the second half of the year.
Operating profit grew by $7.3 \%$ and the group operating margin declined by 10 basis points to $6.1 \%$. The operating
margins for the group, and the retail and distribution segments, are within the targeted ranges despite the investments made in Clicks and UPD during the current tough trading period.
Diluted headline earnings per share increased by $10.3 \%$ to 157.4 cents. An interim dividend of 53.5 cents per share was declared, an increase of $10.3 \%$ over the prior period.

Inventory days in stock moved from 71 to 75 days. Inventory levels were 15.3\% higher at period-end as both Clicks and UPD invested in stock ahead of supplier price increases. Inventory levels are expected to normalise during the second half.
Cash inflow from operations at R400 million reflects good working capital and cash flow management. The group returned R399 million to shareholders through dividend payments and share repurchases, in line with the policy of returning surplus cash to shareholders. Capital expenditure of R129 million was incurred in the first half and the group plans to invest R347 million for the full financial year.
The group's financial and operational performance for the six months has resulted in a sector-leading return on equity of $55.4 \%$.

## Trading performance

Clicks increased sales by $8.2 \%$ with comparable store sales growing by $5.3 \%$. The brand continued to generate real volume growth, supported by promotional activity which accounted for $26 \%$ of sales in the period. Pharmacy sales were $13.1 \%$ higher and Clicks increased its retail pharmacy market share to $17.6 \%$. Clicks extended its store footprint to 453 , with 333 dispensaries and 133 clinics. The Clicks ClubCard loyalty programme has grown active membership to 4.3 million.

The Body Shop increased turnover by $7.1 \%$ with the brand facing margin pressure from the depreciation of the Rand. Musica continued to gain share in all product categories in a declining market.

UPD increased turnover by $14.7 \%$, benefiting from sales to its core customers Clicks and the private hospital groups, and preferred supply chain partner contracts. UPD has

grown its share of the private pharmaceutical market from $25.7 \%$ to $26.3 \%$. The completion of the new distribution facility in Johannesburg has increased warehouse capacity by $50 \%$.

## Outlook

The current challenging consumer trading environment is expected to continue during the second half of the financial year, while selling price inflation is anticipated to average $4 \%-5 \%$ for the year.
Management plans to improve delivery in Clicks by growing sales through its value offer, private label, pharmacy and ClubCard. Clicks will also continue to focus on the prudent management of margin and costs.
UPD aims to extract value from the recent investments in wholesale automation and in distribution capacity while continuing to extract cost efficiencies across the business.
The group remains on track to achieve its medium-term financial and operating targets.

## Full-year earnings forecast

The directors forecast that diluted headline earnings per share for the financial year ending 31 August 2014 will increase by between 8\% and 12\% over the 2013 financial year.
The forecast is based on the following key assumptions: Trading conditions will continue to be challenging as consumer spending remains constrained; selling price inflation will be relatively low and stable for the year; and the group will continue to invest for longer-term growth, mainly in new stores and pharmacies.

Shareholders are advised that this forecast has not been reviewed or reported on by the group's independent auditor.
